

Cybersecurity Assurance and Compliance Platform

Conquer Compliance, Deliver Assurance and Streamline Security

COMPLYAN – An All-in-One SaaS Cybersecurity Compliance Platform that solves many challenges organizations face. Improves governance, quantifies cyber risks, supports building a roadmap, and enhances cyber maturity.

Oversee Policies, Manage Risk, and Ensure Compliance

Policy Management: Complyan offers an integrated policy management module which enables customers to implement and manage information security policies with structured workflows and alignment to global frameworks such as ISO 27001, NIST CSF, NCA-ECC, UAE-IA and etc. It also allows customization to reflect internal policy formats and approval chains.

Risk Management: The platform includes a fully integrated risk management module that supports qualitative and quantitative assessments. Customers can leverage visual tools such as heatmaps and risk scoring, linking risks to controls, assets, and business processes. It also supports risk mitigation planning and progress tracking.

Compliance Tracking: Complyan comes with prebuilt controls and mappings for over 40 international and regional frameworks. This allows to monitor, assess, and automate compliance tracking across frameworks such as UAE-IA, NCA-ECC, ISO 27001, and others with configurable reporting views for different business units or entities.

Empower Multiple Business Units to Work Together on a Single Platform

Complyan supports enterprise-grade RBAC (Role-Based Access Control), allowing secure collaboration among CISOs, risk owners, compliance officers, and audit teams. Each unit can work within their domain while contributing to enterprise-wide GRC visibility.

Benefits

Visibility

Gain 360 degree view

Efficiency

Streamline GRC and reduce cost

Scale

Expand and mature your program

Remediation

Utilize actionable guidance

Reporting

Tailor Risk insights and trends

Stay Updated on Regulatory Changes Affecting the Business

Integrated Framework Intelligence: The platform is regularly updated with evolving standards and regulations across global and Middle Eastern jurisdictions. Complyan's regulatory update mechanism ensures that customer's compliance framework remains current, with mapped alerts for any gaps caused by regulatory changes.

Proactive Monitoring: Complyan's compliance team actively monitors official releases and feeds changes into the platform. For our customers, this translates to reduced manual effort in monitoring regulatory landscapes such as those mandated by the regulatory authorities.

Simplify and Increase the Accuracy of Internal Auditing

Automated Audit Management: The Audit Hub within Complyan supports scheduling, execution, and closure of internal and external audits. It captures audit trails, control tests, and integrates with evidence repositories.

Evidence Collection and Integration: Complyan automates evidence collection by integrating with systems like Microsoft Azure, Office 365, Okta and others. These integrations reduce manual workloads, boost accuracy, and maintain strong audit readiness. Integration availability can be validated during onboarding for customer's environment. for detailed integration list reach out to your Complyan representative.

Security, Scalability, and Integration

Security & Access Controls: Complyan ensures compliance with data protection standards (e.g., GDPR, NCA) and includes user behavior logging, data encryption, and RBAC.

Enterprise Scalability: Customers can scale usage through different licensing tiers (Basic, Pro, Pro+) and extend modules as needed across business units or geographies.

Integration Ecosystem: The platform integrates with third-party systems including Azure AD, Okta, Microsoft 365, and more to enable automated data flows, enhance evidence tracking, and reduce manual dependencies.

Reporting, Dashboards and Custom Reports

Real-Time Dashboards & Custom Reports: Complyan supports on-demand report generation, tailored dashboards, and exportable audit logs. Customers can generate insights per framework, per business unit, or organization-wide to demonstrate compliance posture.

Support and Training

Onboarding and Support: Complyan provides onboarding workshops for customer teams, including policy configuration, risk framework setup, and report customization.

Ongoing Support: Post-deployment, customers can access expert support via help desk or email for additional sessions or guidance on advanced configurations.
